Thank you all for coming out to play in the snow, especially those who helped by running stages. We hope you come back next month for the opening match of the 2010 season. There were four shooters we could not find score sheets for, so we could not publish those scores.

For newcomers – explanation of scoring

The first number under each stage is your total time for the stage. This is calculated by adding your raw time, plus additional time for points down and penalties. In the parenthesis is the number of points down for each stage. These are converted to seconds. Each point is worth a half a second. If you got a procedural (often given for shooting targets out of order) 3 seconds was added to your raw time. For other penalties see the rulebook.
